Solun

Secure Online tool for encrypting/decrypting messages and sending them via links to colleagues.

Project Web: <https://solun.pm>

Project Doc: <https://jsde.me/tags/solun>

Portfolio

My portfolio and blog where you can accompany me on my journey.

Project Web: <https://jsde.me>

Homelab

Learning to build and manage a Network from scratch. And scale it up to real enterprise Network of dedicated Servers and public Services.

Project Web: <https://scpx.de>

Project Doc: <https://jsde.me/tags/homelab>

SPWHub

Build a highly reliable network so that our developed and hosted services have the highest possible uptime.

Project Web: <https://spwhub.com>

Project Doc: <https://jsde.me/tags/spwhub>

Self Assesment

As a system administrator, I strive to keep networks running smoothly and efficiently. I enjoy finding creative solutions to technical problems. My goal is to help make the internet a faster, more user-friendly place, especially for my organization. I aim to streamline development and maintenance for my team. I'm continuously pushing myself to improve my skills and exceed my own expectations. I'm motivated to make positive contributions in my role.
